- 1635 first town supported school opens
- 1647 Old Deluder Act
- 1700 Only Boy's from wealthy families were sent to school
- 1600-1800 Free enterprise system
- 1800's Schools begin to develop out west

Horace Mann 1796-1859

- Known as the father of American common school system
- Pioneered the first American common school
- Initiated a free education enterprise
- Mann put his beliefs into implementation as a protest to the lack of reference to education in the US Constitution

John Dewey 1859-1952

- Viewed education as a process of experiential tasks which results in learning.
- This supported his argument that teachers needed to understand the nature of the human experience in order to be effective.
- To this end he believed that a good education should include both a societal, as well as a personal purpose for the student (Dewey, 1938).

Benjamin Bloom 1913-1999

Responsible for developing the taxonomy of education.

The taxonomy of education is composed of three domains:

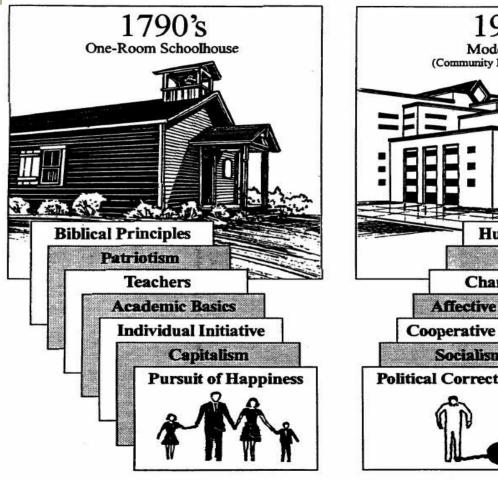

- cognitive domain- The cognitive domain involves the development of intellectual skills. The intellectual skills are broken down into six sub domains (Bloom, 1956).
 - Remembering, Understanding, Applying, Analyzing, Evaluating, Creating
- affective domain- growth/ feelings in emotion
- psychomotor domain-manual/physical

Col. Francis Parker 1837-1902

- Was a Colonel in the Union Army in the Civil War.
- This experience as a leader identifying and utilizing individual skills was the foundation for his belief in education.
- He took Dewey's idea and ramped it up to a higher level with the idea of student centered learning.
- He is known as the father of American Educational Reform
